To top: Apply Nail Art Glue Gel a little thicker on the buffed nail, then pour in and slightly press in the chosen decoration. Fill with a little bit of nail polish, add a little bit of the nail art and a little bit of the nail. Because of the larger glitter grains, there is a greater chance of chipping, so this technique is recommended for occasional use.

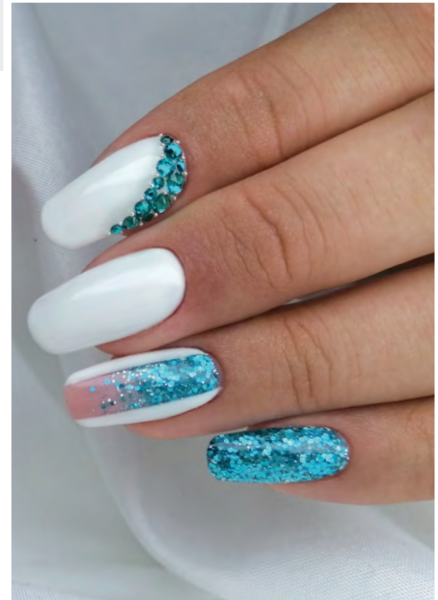

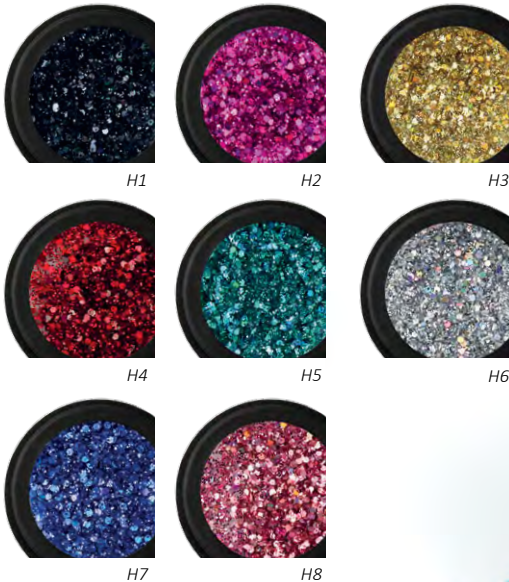

Built in gel&lac: Apply 2 coats of the same colour as the chosen glitter to the nail, then after the second coat, Nail Art Glue Gel is applied to the nail surface and the glitter is sprinkled on.

Fill in, sweep off the excess, then with a firmer substance e.g. Flexi Hard Gel, Mani Gel Clear, Mani Gel extra clear, cover the nail with a little C-curve, closing the edges! After filling, fix the nail, shape the surface with a file/buffer and cover with Extra Top, closing the edges!

Built in gel: 2 coats of the same colour as the chosen decoration, then after the second coat, buff the nail, coat the surface with Nail Art Glue Gel and sprinkle the decoration. Sparkling finish: Apply 2 coats of gel or gel polish and sprinkle the chosen decoration on the second coat, then leave in the lamp for 1 minute. After lamping, sweep off the surface, then coat the nail with 2 coats of Extra Top. If the nail would be uneven with larger glitter particles, buff the surface after the light gel and cover with another coat of Extra Top.

Mermaid effect - gel-lac: After applying 2 coats of colour, use a thin layer of a transparent gel polish (e.g. Mani Gel Top), which sets to a sticky consistency, then press the chosen decorative ornament into the sticky layer after curing, then smooth the grains in a gentle circular motion.

Mermaid effect - for Brush&Go gel or non-cleansing colours: After applying 2 coats of colour, buff the surface, then apply a thin layer of a clear, sticky gel-lac (e.g. Mani Gel Top). From there, apply as described for the mermaid effect.

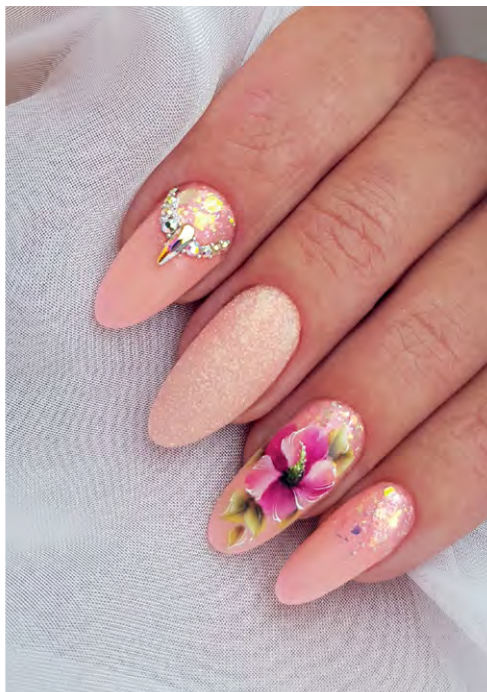

Candy effect: On the finished, glossed or matted nail surface, draw the pattern, using a colour similar to the glitter (so that the colour difference is not noticeable when worn). Before curing, apply one of the tiny glitters and cure for at least 1 minute. Brush off any excess glitter from the finished pattern. Do not cover with glitter afterwards!

Cuticle drill bit, finer than the cuticula pusher nail bit, so use as a first step in manicure for moderately keratinized skin.

Skin protector diamond bit:

This bit developed for very thin skin, which can be used deep in the nail fold for all skin types as the second step in a machine manicure.

Deep clean diamond bit:

For professional work! The bit you can use for the deepest keratinization removal. Recommended as the last step of a manicure.

Softener nail bit:

We recommend the Softener nail bit with diamond powder for refining the skin, as the last step of the manicure. Use after scissors on the cuticle area to refine the skin. With large surface for quick work.

Perfect skin diamond nail bit:

The small size allows the skin to be refined even close to the nail after the skin cutting. It can be used even instead of scissors depending on the skin type! Recommended as the last step in a manicure.
